## Artist Directory Screen

Filter artist by name as the user types until only the artist ~~one~~ that was entered remains

Clicking the Artist name will then render the individual artist details

Make headshots panel using styles to create the oval

Test that each image adapts to the styling well → otherwise reformat images

Data is rendered dynamically from the Artists array

- Artist Name
- Artist Image
- Artist Genre → rendered as color-coordinated badges under the artist's name and in a row

# Individual Artist Pages

Image carousel of set-formatting images that are specific to this artist

With left and right scroll arrows

Render as pill-shaped, color-coordinated badges from the genres array in the artist object

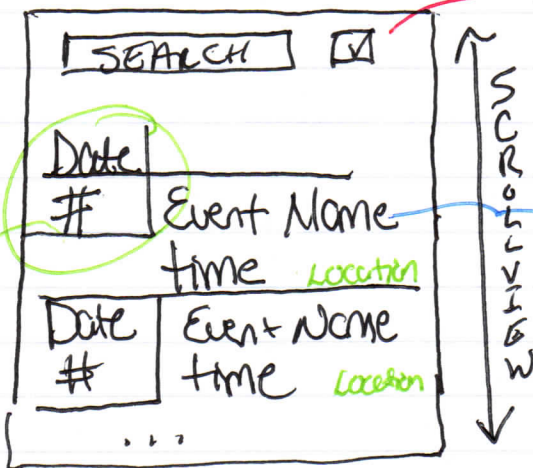

List of embedded media specific to this artist.

Click on item in the media list brings up a modal that has a music player for that track

Render ~~page~~ based on the events array and the artist id from the artist array

Clicking on item in the upcoming events list takes you to that event page.

# Calendar Screen

Filter by event name  
Similar behavior to Artist directory search

Clicking on an event name will then render the individual event page

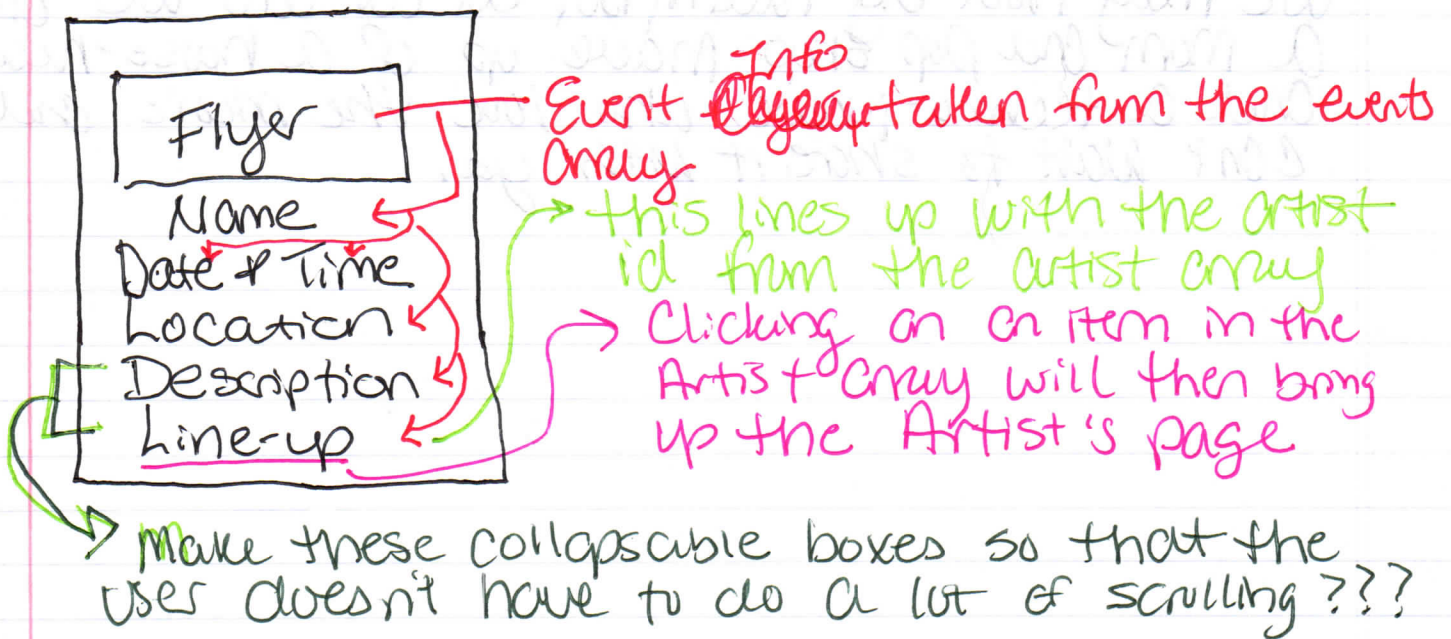

Aug	Event Name
5	time
21	Event location

Data is funcd in the events array.

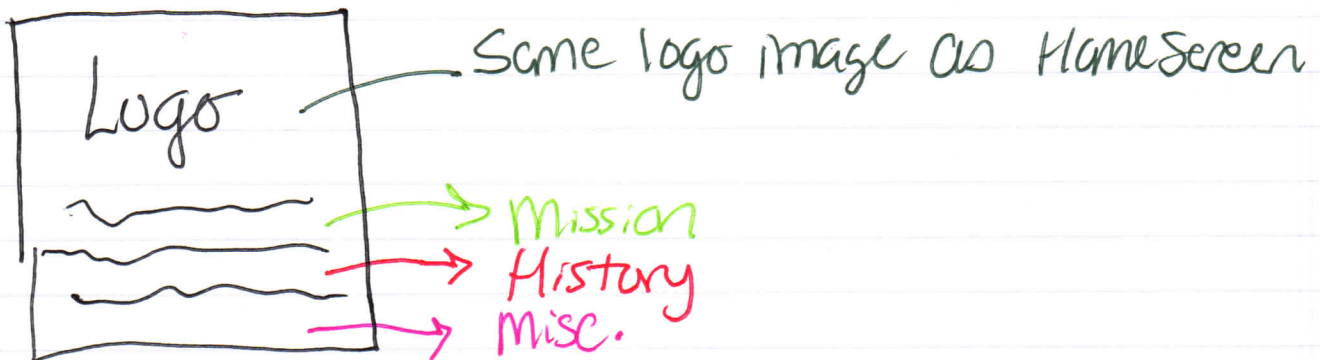

- name
- Date
- Time
- location

## AboutScreen

Our mission is to pretend to bring yw the very best in House, Techno, and electronic music.

J & J Promotions was established in 2010, after the big push away from the rave scene to the club scene. We have always been the leaders in finding talent in both obvious and obscure places. Since our start, we strive to push the envelope on sound, mood, vibes, feelings, etc. ↓

We may host big talent, but at our core we are  
a mum and pop shop made up of a house-hill  
and a techno-junkie who love the music and  
can't wait to share it with you.
